EDUCATION

University of Waterloo

Sept 2020 - Apr 2025

BASc., Management Engineering, Computing Option

- Graduated with Distinction - Dean's Honour List (Top 10% of the Cohort)

EXPERIENCE

Capital One

Process Manager, Rewards

Sept 2025 - Present

- Managing \$xxM rewards program portfolio at Capital One, currently implementing in-app features to increase redemption rates

Process Manager, Canada Card Fulfillment

Sept 2024 - Dec 2024

- Built and automated data pipelines to develop a [KPI monitoring dashboard](#) in AWS QuickSight using Snowflake data, **reducing daily manual processing time by 86%** and enabling real-time decision-making
- Automated company-wide quality control chart creation in Python (pandas, plotly), transforming **raw process data into actionable insights** for proactive process health monitoring

Process Manager, Credit Limit Increase Program

May 2023 - Aug 2023

- Analyzed data and logic pipelines to identify bottlenecks, then presented a process binder (SIPOCs, Swimlanes, FMEA, Control Plan) **recommending a shift from monthly to daily credit limit decisions**
- Developed a dashboard on Snowflake to monitor of the **impact of credit limit increases on the secured card customer** population

Loblaw Digital, PC Optimum

Jan 2024 - May 2024

Data Analyst

- Conducted exploratory data analysis in BigQuery to uncover a correlation between email engagement and onboarding retention (+11%), directly shaping loyalty program strategy
- Led the analysis and launch of a new offer type for PC Optimum members, **resulting in 4% increase in WAU** for the test group
- Built onboarding offer sets to **improve offer redemption by 3%**, increasing the points earned in a customer's first 4 weeks

KPMG

Sept 2022 - Dec 2022

Product Manager

- Developed Excel VBA macros for client input documents, **automating the import and calculations of 10,000+ transactions weekly**
- Led the refinement of the product's data dashboard feature to improve the process of personalizing tax calculation visualizations

AMLB CPAs and Consulting

Jan 2022 - May 2022

Senior Consultant, Data and Analytics

- Designed and automated a data pipeline integrating BambooHR and Karbon APIs into Excel (PowerQuery), **enabling real-time KPI tracking for quarterly performance reviews**

PROJECTS

On-Ball Value (OBV) Model for Women's Football

Aug 2025

2025 Women's Euros

- Developed an OBV on the Women's 2025 Euro data to determine the most valuable player throughout the tournament
- Shipped an [interactive dashboard](#) (pandas, plotly, Streamlit, scikit-learn) to display **team and player level performance analysis**
- Wrote a jargon-free [blog post on thebraindump](#) (1.1k+ reads) to drive understanding and interest in Women's Football

UberAds Portal

Apr 2024 - Apr 2025

Engineering Capstone Project with Uber

- Developed an end-to-end Advertising portal, **unlocking live ad campaign tracking and Uber ad recommendations** (XGBoost)
- Designated client liaison to support the collaboration with the Programmatic Advertising and Partnerships Global team at Uber
- Created functional requirements diagrams and user persons to gather client feedback and develop a prototype on Streamlit

MusicalOutfits - Music & Clothing Predictor

Jan 2023 - Apr 2023

Introduction to Machine Learning

- Identified patterns and trends in the collected data's features using Python (seaborn, pandas, matplotlib) to develop a model
- Trained a Naive Bayes model utilizing scikit-learn, **providing personalized music genre recommendations** based on the user's outfit

SKILLS

Data: [ETL](#) / Data Pipelines, Exploratory and Statistical Data Analysis, Data Visualizations, [Predictive Model Development](#)

Software: AWS Quicksight, [dbt](#), BigQuery, Snowflake, Databricks, Miro, Jira, Confluence, GitHub, Visual Studio Code, Final Cut Pro

Languages: SQL, Python, Java, JavaScript, Excel (VBA, PowerQuery), JSON, R, HTML, CSS
