EDUCATION

University of Waterloo

Sept 2020 - Apr 2025

BASc., Management Engineering, Computing Option

- Graduated with Distinction - Dean's Honour List (Top 10% of the Cohort)

EXPERIENCE

Shopify

Jan 2026 - Present

Product Data Science Intern, Growth RnD

- Designed an experiment for Shopify's sign up funnel using **Bayesian** power analysis, ensuring statistically valid ship/no-ship decisions
- Classified merchants by subscription pricing adoption likelihood and **forecasted GMV lift** across markets to optimize rollout strategy
- Developed automated monitoring pipelines using **dbt and Airflow** to track custom conversion metrics on the experiments platform
- Quantified **merchant retention and churn trends** across the user lifecycle to identify friction points and reduce negative app reviews

Capital One

Process Manager, Rewards & Risk-Based Pricing

Sept 2025 - Jan 2026

- Led the rollout of in-app rewards redemption with Product and Strategy, validating A/B test results and **authoring the credit decision driving \$4.7MM in annual revenue** and 2,200 fewer agent calls, translating to \$8.8K in operational savings
- Built an automated risk-based pricing triage system (SQL) to identify mispriced accounts, **reducing 1 day of manual work to a 2-minute query** and identifying \$1K+ in incorrect customer interest charges per month

Process Manager Intern, Canada Card Fulfillment

Sept 2024 - Dec 2024

- Built and automated data pipelines to develop a [KPI monitoring dashboard](#) in AWS QuickSight using Snowflake data, **reducing daily manual processing time by 86%** and enabling real-time decision-making
- Automated company-wide quality control chart creation in Python (pandas, plotly), transforming **raw process data into actionable insights** for proactive process health monitoring

Process Manager Intern, Credit Limit Increase Program

May 2023 - Aug 2023

- Analyzed data and logic pipelines to identify bottlenecks, then presented a process binder (Dashboards, SIPOCs, Swimlanes, FMEA, Control Plan) **recommending a shift from monthly to daily credit limit decisions**

Loblaw Digital

Jan 2024 - May 2024

Data Analyst Intern, PC Optimum

- Led the analysis and launch of a new offer type for PC Optimum members, **resulting in 4% increase in WAU** for the test group
- Built onboarding offer sets to **improve offer redemption by 3%**, increasing the points earned in a customer's first 4 weeks

KPMG

Sept 2022 - Dec 2022

Product Manager Intern, Ignition Tax

- Developed Excel VBA macros for client input documents, **automating the import and calculations of 10,000+ transactions weekly**
- Led the refinement of the product's data dashboard feature to improve the process of personalizing tax calculation visualizations

PROJECTS

On-Ball Value (OBV) Model for Women's Football

Aug 2025

2025 Women's Euros

- Shipped an [interactive dashboard](#) (pandas, plotly, Streamlit, scikit-learn) to display **team and player level performance analysis**
- Wrote a jargon-free [blog post on thebraindump](#) (2.3k+ reads) to drive understanding and interest in Women's Football

UberAds Portal

Apr 2024 - Apr 2025

Engineering Capstone Project with Uber

- Developed an end-to-end Advertising portal, **unlocking live ad campaign tracking and Uber ad recommendations** (XGBoost)
- Designated client liaison to support the collaboration with the Programmatic Advertising and Partnerships Global team at Uber

MusicalOutfits - Music & Clothing Predictor

Jan 2023 - Apr 2023

Introduction to Machine Learning

- Identified patterns and trends in the collected data's features using Python (seaborn, pandas, matplotlib) to develop a model
- Trained a Naive Bayes model utilizing scikit-learn, **providing personalized music genre recommendations** based on the user's outfit

SKILLS

Data: Experiment Design, Data Pipelines (ETL), Exploratory and Statistical Data Analysis, Predictive Model Development

Software: BigQuery, Marimo, [dbt](#), Airflow, Snowflake, AWS Quicksight, Claude Code, Cursor, Miro, Jira, Final Cut Pro

Languages: SQL, Python, R, Java, JavaScript, Excel (VBA, PowerQuery), JSON, HTML, CSS
