Education

University of Waterloo

Sept 2020 – Apr 2025

BASc., Management Engineering, Computing Option

- Graduated with Distinction – Dean's Honour List (Top 10% of the Cohort)

Experience

Shopify

Product Data Scientist, Digital Products

Apr 2026 – Present

- Built an interrupted time series quasi-experiment for the Digital Downloads onboarding guide, measuring a **+10.8% lift in first product activation** and **48% reduction in median time to first attachment** (14 min to 7 min), influencing **120K+ annual merchant installs**, a lifecycle marketing nudge targeting **15K in-progress merchants**, and **\$2M in 10Y CPV**

Product Data Scientist, Monetization

Jan 2026 – Apr 2026

- Led the analysis for a signup redesign A/B experiment across **1M+ monthly users**, uncovering bot contamination that masked a **+2.35% visitor-to-merchant conversion lift** and **+3.49% authentication success lift**, resulting in a ship recommendation
- Scoped an ambiguous market analysis into a **\$438M untapped subscription GMV opportunity** and **\$1.5B+** across 3 additional verticals by analyzing **176K+ merchants** across 6 markets, directly informing the 2026 monetization roadmap
- Shipped an A/B experiment on the Authentication Sign-Up flow (custom metrics via dbt/Airflow), identifying a **+2.59% lift in account selection CTR** while preventing accidental shop creation, resulting in a partial ship recommendation
- Uncovered a billing issue incorrectly charging **0.58% of churned merchant signups** and built a **\$6.5M annual revenue tradeoff model** to inform a leadership product decision
- Built AI-native onboarding tooling adopted team-wide and authored educational content on e-values to drive company-wide sequential testing experimentation adoption

Capital One

Process Manager, Rewards & Risk-Based Pricing

Sept 2025 – Jan 2026

- Led the rollout of in-app rewards redemption with Product and Strategy, validating A/B test results and authoring the credit decision driving **\$4.7MM in annual revenue** and **2,200 fewer agent calls**, translating to **\$8.8K in operational savings**
- Built an automated risk-based pricing triage system (SQL) to identify mispriced accounts, reducing **1 day of manual work to a 2-minute query** and identifying **\$1K+ in overcharged** customer interest per month

Process Manager, Canada Card Fulfillment

Sept 2024 – Dec 2024

- Built and automated data pipelines to develop a KPI monitoring dashboard in AWS QuickSight using Snowflake data, **reducing daily manual processing time by 86%** and enabling real-time decision-making
- Implemented a company-wide initiative to automate quality control chart creation using Python (pandas, plotly), enabling proactive process health monitoring

Process Manager, Credit Limit Increase Program

May 2023 – Aug 2023

- Analyzed data and logic pipelines to identify bottlenecks, then presented a process binder (Dashboards, SIPOCs, Swimlanes, FMEA, Control Plan) **recommending a shift from monthly to daily credit limit decisions**
- Developed a dashboard on Snowflake to monitor the **impact of credit limit increases on the secured card customer** population

Loblaw Digital

Jan 2024 – May 2024

Data Analyst, PC Optimum

- Led the analysis and launch of a new offer type for PC Optimum members, resulting in **4% increase in WAU** for the test group
- Built onboarding offer sets to improve offer redemption by 3%, increasing the points earned in a customer's first 4 weeks

KPMG

Sept 2022 – Dec 2022

Product Manager, Ignition Tax

- Developed Excel VBA macros for client input documents, automating the import and calculations of **10,000+ transactions weekly**
- Led the refinement of the product's data dashboard feature to improve the process of personalizing tax calculation visualizations

Projects

On-Ball Value (OBV) Model for Women's Football

Aug 2025

2025 Women's Euros

- Shipped an interactive dashboard (pandas, plotly, Streamlit, sk-learn) to display team and player level performance analysis
- Wrote a jargon-free blog post on thebraindump (3.2k+ reads) to drive understanding and interest in Women's Football

UberAds Portal

Apr 2024 – Apr 2025

Engineering Capstone Project with Uber

- Developed an end-to-end advertising portal, unlocking live ad campaign tracking and Uber ad recommendations (XGBoost)
- Designated client liaison supporting collaboration with the Programmatic Advertising and Partnerships Global team at Uber

Skills

Data: Experiment Design, Data Pipelines (ETL), Exploratory and Statistical Data Analysis, Predictive Model Development

Software: BigQuery, Marimo, dbt, Airflow, Snowflake, AWS QuickSight, Claude Code, Cursor, Miro, Jira, Final Cut Pro

Languages: SQL, Python, R, Java, JavaScript, Excel (VBA, PowerQuery), JSON, HTML, CSS
